

Project Presentation

1. Each group will present for at most 7 minutes and then have a 3 minute Q&A.
2. All students in the group should have a part in the presentation (even if it is one slide)
3. Basic structure should follow paper structure (slide numbers are just a suggestion):
 - a. Introduction (1 slide)
 - b. Previous work (1 slide)
 - c. Technical approach (2 slides)
 - d. Implementation (1 Slide)
 - e. Dataset (1 Slide)
 - f. Results (1-2 Slides)
 - g. Conclusion and future work (1 Slide)
4. Complete work may not be done at that date so just present the results that you have.
5. I will have an assignment to submit the presentations by Monday morning.
6. To keep everyone engaged there will be an additional assignment during class for each student to write at least one sensible question for each presentation.
